Yujie He contributed the most to the laboratory work in the last 3 years. She was listed as the first co-author in previous versions of the manuscript. However, she was not mentioned as the first co-author in the Author Contributions by mistake. Therefore, the corrigendum was used to explicitly prove that Yujie He is the first co-author of this paper.

Author contributions. YD and QW designed the study, JC, YQ and SY collected the soil samples, and YH and XG performed laboratory measurements. SY did modeling work. All authors contributed to the discussion of the results. SY led the writing of the paper and all co-authors contributed to it. YH is the first co-author of this paper.
