

Supplement of

Active subglacial lakes in the Canadian Arctic identified by multi-annual ice elevation changes

Figures S1 to S37

Supplementary Figures

Figures S1–S37 show the observations and analysis for individual subglacial lakes. Each figure contains the following panels:

- (a) Regional map showing the location of the lake in the Canadian Arctic.
- (b) Sentinel-2 true-color image in August 2020 showing the surface conditions of the lake. The green star indicates the sampling location of the elevation and ice velocity data in panels (e) and (f). RGI 7.0 glacier outlines are illustrated as black lines.
- (c) ArcticDEM surface elevation around the lake. ICESat-2 measurement locations for DEM alignment are plotted as orange dots. RGI 7.0 glacier outlines are illustrated as black lines.
- (d) Elevation change of lake; the zoom-out version of the corresponding lake panel from Figure 2. The panel is color-coded by the ice elevation change (dH) during the selected short-term event (specified in panel (e) as a dashed line and Table 1) between 2011 and 2022. Lakes 5, 7, 25, 31, and 32 do not have any short-term events and are visualized by the linear elevation change rate (dH/dt) between 2011 and 2022 instead.
- (e) Ice surface elevation over time at the lake location, derived from the ArcticDEM strip data. Purple squares are observations used for the regression model (green curve), and yellow circles are the flagged outliers excluded from the regression model. Vertical bars indicate the $2\text{-}\sigma$ error of the observations. The vertical dashed line indicates the selected short-term event to be plotted in panel (d).
- (f) Surface ice velocity over time at the lake location, derived from the ITS_LIVE data set. The vertical dashed line indicates the selected short-term event to be plotted in panel (d).

Lake #1: 82.428°N, 80.300°W

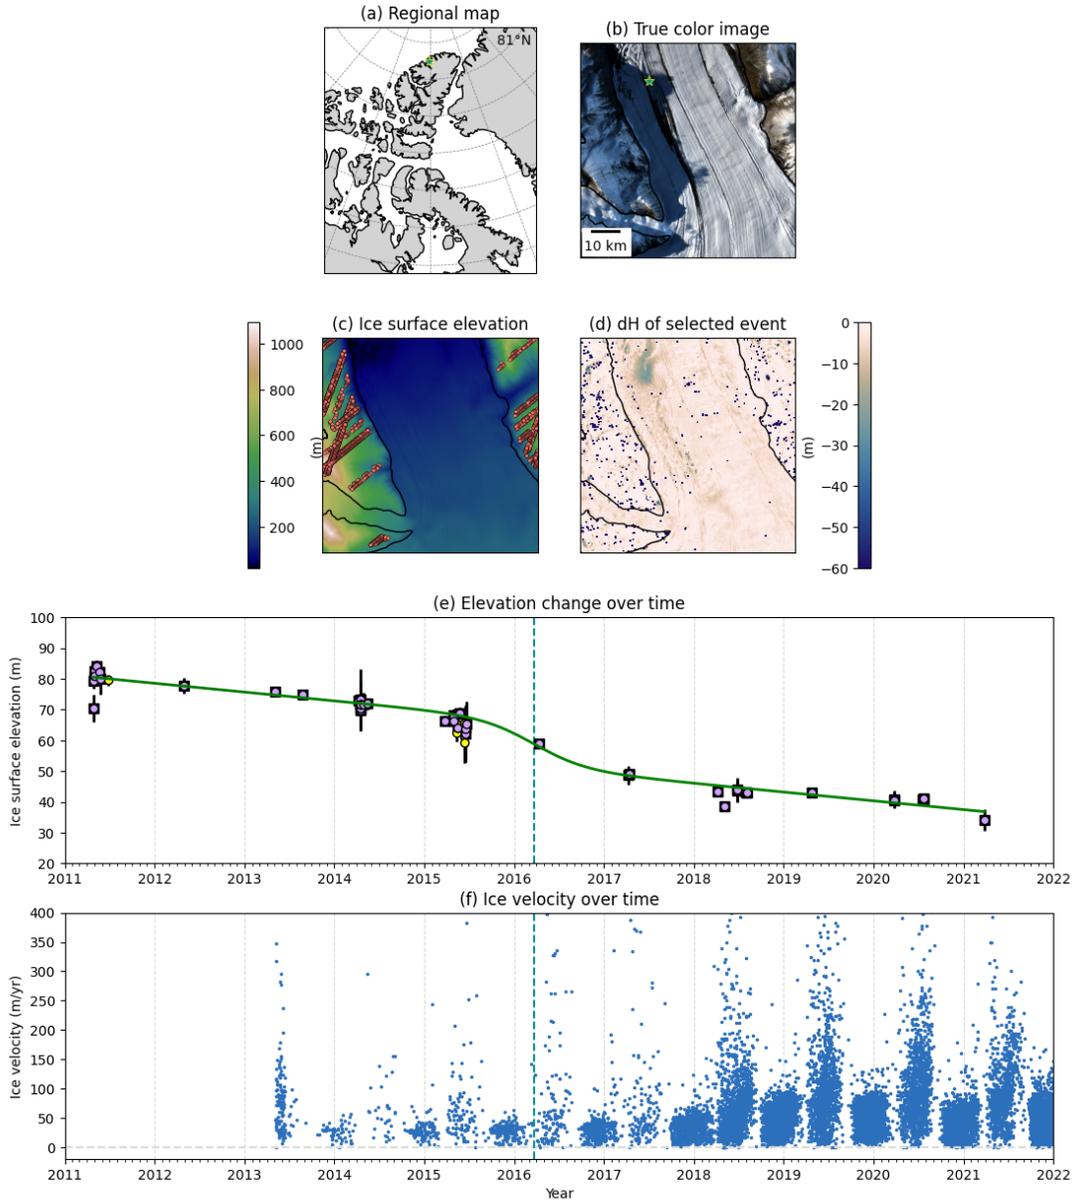

Figure S1: Analysis of Lake 1. See supplementary text for detailed description.

Lake #2: 82.212°N, 78.390°W

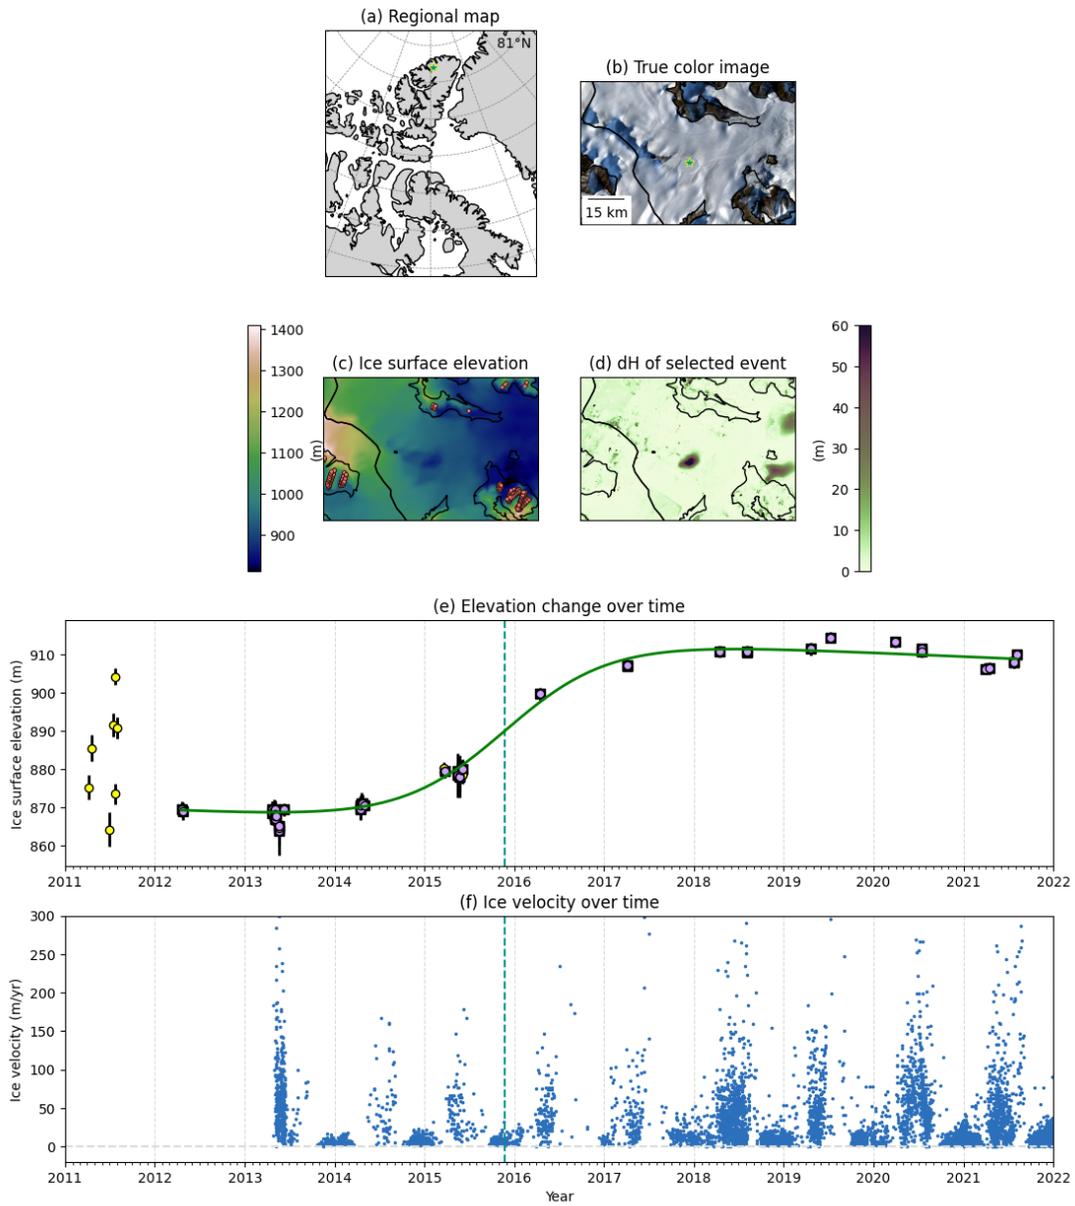

Figure S2: Analysis of Lake 2. See supplementary text for detailed description.

Lake #3-a: 82.226°N, 78.151°W

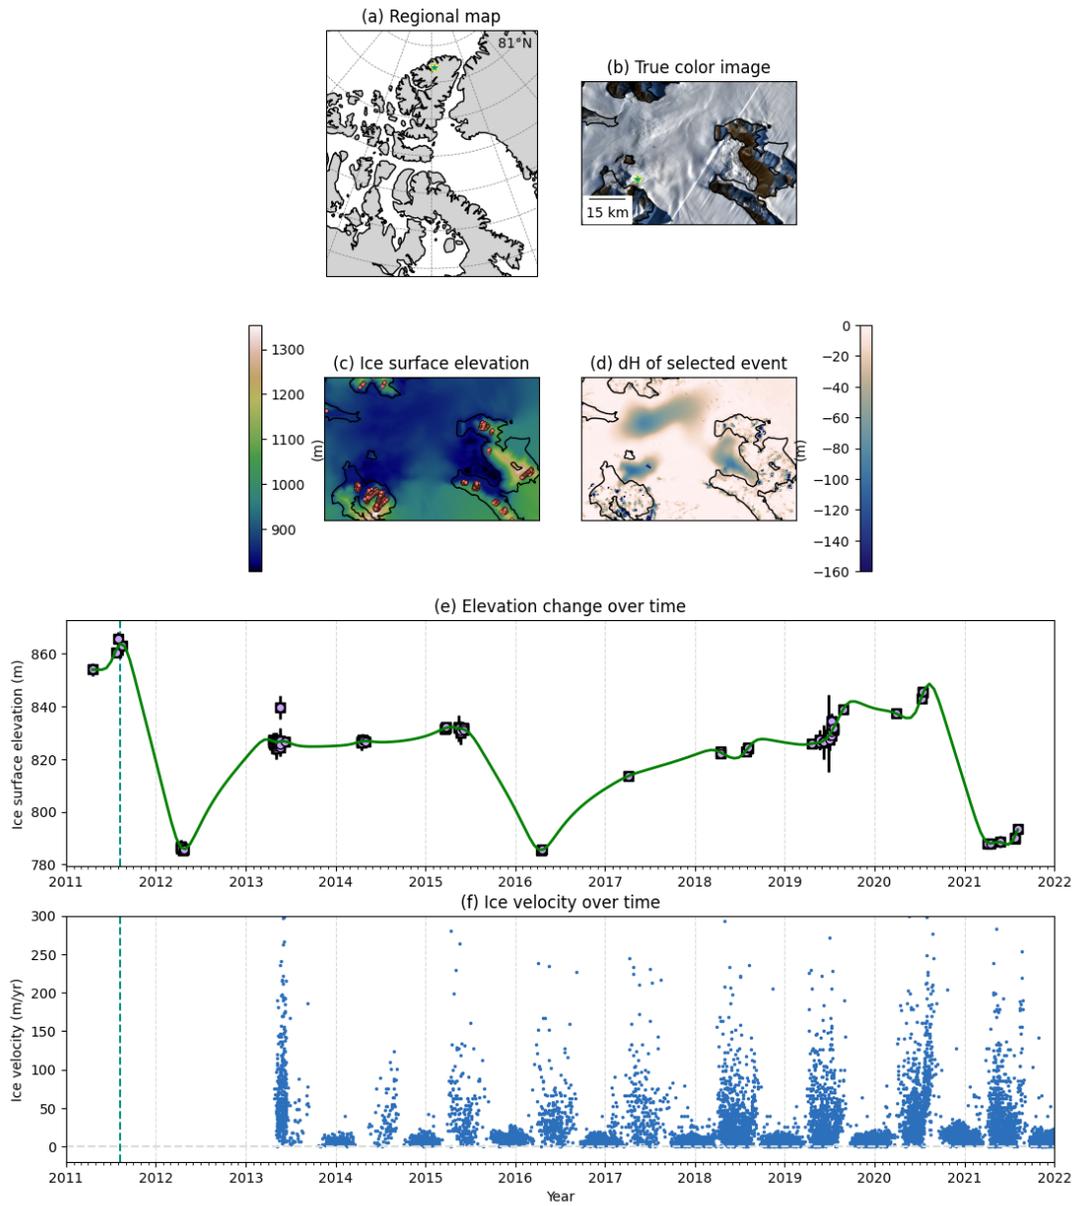

Figure S3: Analysis of Lake 3-a. See supplementary text for detailed description.

Lake #3-b: 82.245°N, 78.206°W

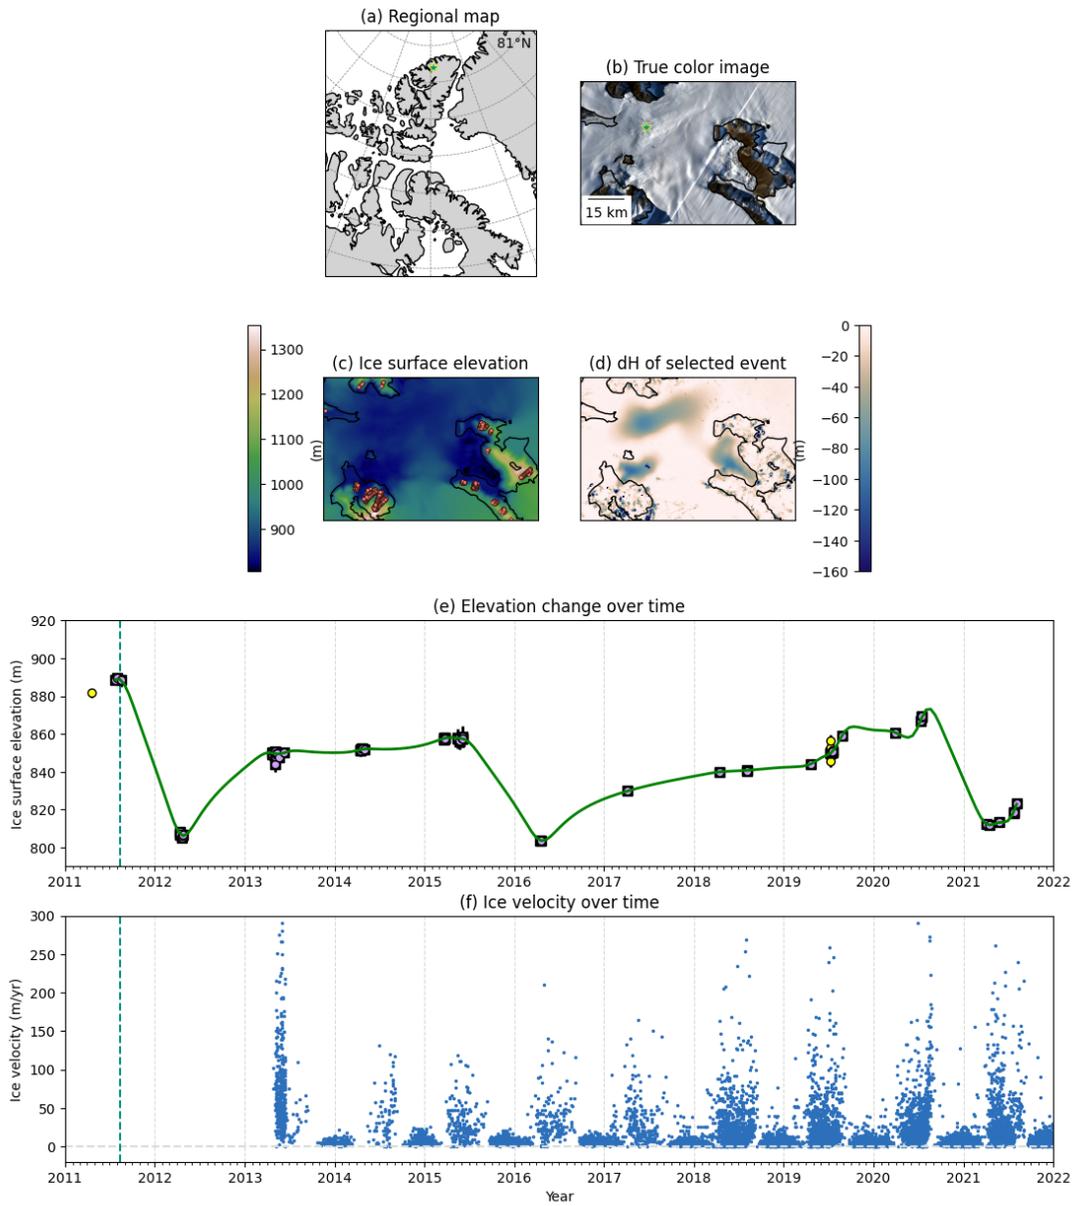

Figure S4: Analysis of Lake 3-b. See supplementary text for detailed description.

Lake #3-c: 82.250°N, 77.949°W

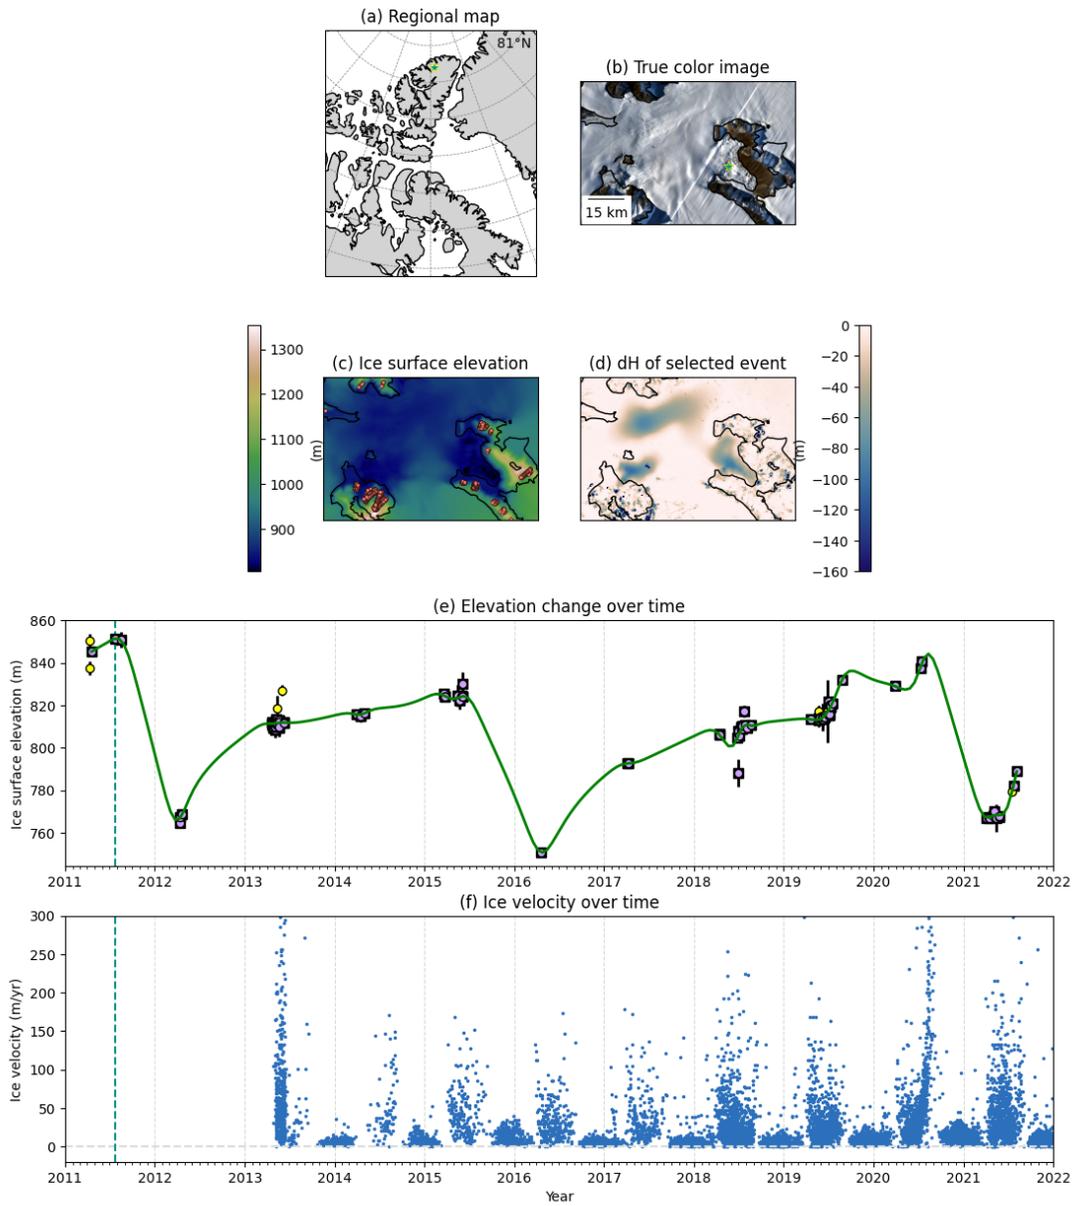

Figure S5: Analysis of Lake 3-c. See supplementary text for detailed description.

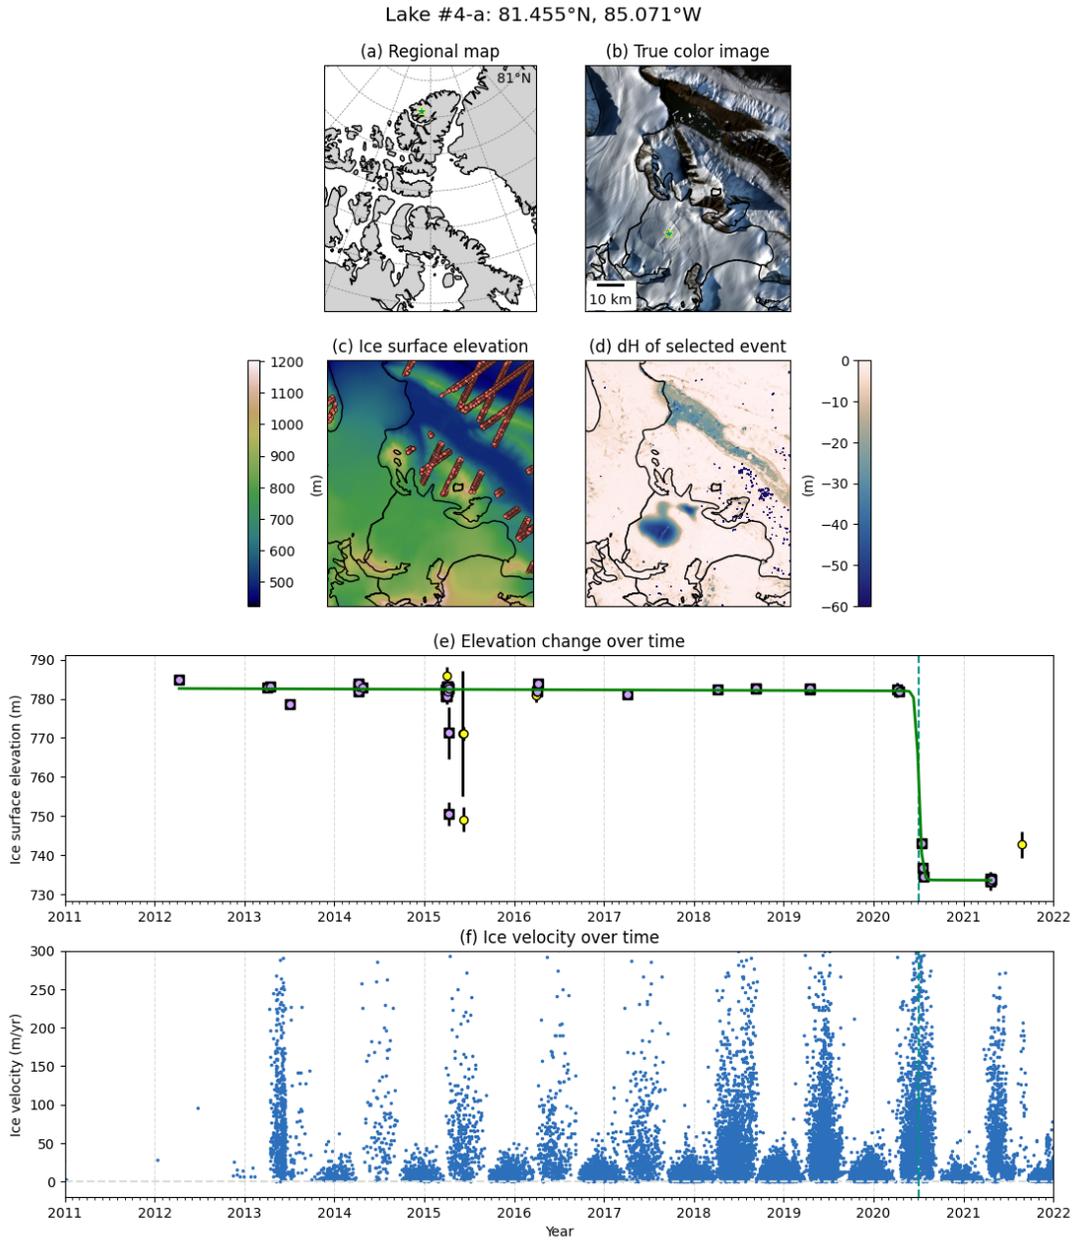

Figure S6: Analysis of Lake 4-a. See supplementary text for detailed description.
