

## ***Interactive comment on “Glacier annual balance measurement, prediction, forecasting and climate correlations, North Cascades, Washington 1984–2006” by M. S. Pelto***

**M. Van den Broeke (Editor)**

broeke@phys.uu.nl

Received and published: 31 August 2007

I recommend that this paper remains in the discussion section of The Cryosphere.

This decision is based on the detailed review that points out many small and larger deficiencies in the MS and in the scientific approach.

Another point of concern is the relatively modest amount of original material presented in the MS compared to earlier publications.

I hope and trust the detailed remarks made by the reviewer will be useful in guiding future research.
