

## ***Interactive comment on “Thresholds in the sliding resistance of simulated basal ice” by L. F. Emerson and A. W. Rempel***

**J. Hagen (Editor)**

joh@geo.uio.no

Received and published: 14 September 2007

I would like to express my thanks to both reviewers who did a very thorough job on the paper and to the authors who responded clearly to the comments. I agree that this is an interesting paper that will be accepted for publication in TC after minor revisions by the authors following the reviewers suggestions. I look forward to the final revised version of the paper.
