Received and published: 11 April 2008

Dear authors,

both reviewers support final publication of the paper. They tend to agree on the modifications that are needed before your paper can be published in TC. Most of the suggested revisions are of a technical nature and the reviewers give concrete guidelines how these revisions should be done.

I invite you to revise your MS along the lines set out by the reviewers. Please pay particular attention to 1) shortening the paper as indicated and 2) provide some sort of model validation as suggested by the reviewers.

I look forward to your revised paper.
