

## ***Interactive comment on “Benchmark experiments for higher-order and full Stokes ice sheet models (ISMIP-HOM)<sup>1</sup>” by F. Pattyn et al.***

**F. Pattyn et al.**

Received and published: 24 May 2008

The second referee corroborates what Referee 1 has mentioned before, especially with respect to 'accuracy' and the use of terminology.

We will correct for the issues raised here, such as linear momentum balance and hydrostatic pressure. And the error in the figures will be checked.
