

***Interactive comment on “A new 1 km digital elevation model of the Antarctic derived from combined satellite radar and laser data – Part 1: Data and methods” by J. L. Bamber et al.***

**J. L. Bamber et al.**

Received and published: 16 February 2009

This referee makes two comments, which we respond to below.

1) availability of the DEM. We will add a sentence outlining its availability: it is available to anyone that wants it and we hope to make it available via the NSIDC for long term archival.

2) Fig 9. We will add a discussion of figure 9, also picked up by another reviewer.
