Received and published: 14 August 2009

Dear authors

Both referees conclude that the submitted study is, in principle, interesting and I support its publication in TC. However, the referees also identify a number of major deficiencies, which need to be addressed towards a scientifically sound paper. I invite you to perform these major revisions and re-submit the manuscript together with a response to the referees as author comment (AC) in TCD. Don't hesitate to contact me in case of questions.
