Received and published: 25 May 2010

I would like to express my thanks to the reviewers who did a very thorough job on the paper and have made a number of suggestions for improving the paper. However, both reviewers conclude that the paper is far from ready for publication in The Cryosphere. I will therefore like to end the review process and recommend that the paper stays in TCD, but will not be published in TC. I think the authors should read carefully the advices given by the reviewers and consider reworking the paper for future publication.
