Response to Reviewer #2's comment on Page C1565.

The following figure failed to attach in the original reply to the reviewer#2 on page c17.

The comment on page C1565 of interactive discussion is:

"Line 27: [...] sea-salt modifications were predominant throughout the year [...]" again, no clear seasonality is put in evidence. I would like to see a plot of concentrations vs time."

We have included the plot showing concentration vs. depth below which shows clear

C1816

differences in the seasonal sea-salt input.

Interactive comment on The Cryosphere Discuss., 5, 2967, 2011.
