Unfortunately, we discovered a few typos in Table 2, hence Figure 5.

1. Model EBU1 is not a SIA model, but an SSA model. It has been taken into account in the analysis of steady-states as an SSA model.
2. Model ORY1 is not a SSA-H model, but a SIA/SSA-H model, i.e. an SIA model for the grounded ice sheet with an SSA ice shelf and applied heuristic rule. However, this is not a major concern at all, since its behaviour is essentially governed by the heuristic approach and not by the fact that the grounded ice sheet is SIA or SSA. This has no effect on the results described in the manuscript.
