Received and published: 13 February 2013

Dear Dr. T. Zhang, Thank you very for your valuable comments and reviews for our manuscript, which should help to improve our manuscript. The comments and suggestions from the two referees were utterly considered and reflected in revising the manuscript. We hope that the revised manuscript will meet requirements of the two referees and will be accepted as the final paper for the publication in TC.

As you suggested, Figure 4 will be separated to four sheets with two rows of images in each sheet.
