P4243 L16: I don't see the direct connection to Laternser and Schneebeli (2003) in this context?

P4246 L22-L26: Today, ANETZ and ENET have been merged to SwissMetNet. Please note, that at least half of the manual measurements are provided by MeteoSwiss observers.

P4246 L27-L28: What is the extent of measurement sites? Only the number of automatic measurements has increased whereas the manual measurements have clearly decreased.

P4249 L1: First generally: "Quantile mapping has been applied for daily precipitation

C1563

and ..." Then specifically: "In this study quantile mapping has been used to calibrate...."

P421 L19-20: You may therefore show relative RMSE.

Table 3: "BI" or "BN"?

Figure 10: Unit is missing

Figure 14: Runoff where?
