Received and published: 4 September 2013

Dear authors,

You have now two reviews and one comment for your paper. More comments might come before the discussion is closed, but I already encourage you to work on a new version of your manuscript which will account for the reviewer remarks. You will have to produce a point by point reply to the reviews and comment. I would appreciate if you can include to this reply a revised version of the paper highlighting the modifications.

Best regards, Olivier Gagliardini
