We would like to thank Gordon Hamilton (referee #2) for his constructive comments on this paper for which we are very grateful. We have read the recommendations with interest and believe we can take them fully into account in a revised manuscript. We also understand that there is some confusion about how we have named and identified the water masses and we, as per recommendation, use the most conventional/clear names in in any revision. We also appreciate that we have over-interpreted our dataset particularly in attempting to infer the inter-seasonal fjord circulation, hence we will simplify our interpretation and attempt to make our findings more general. We particularly
