Object: TC-2014-73: Re-submission of the revised manuscript

Dear Dr. Valentina Radic,

Please find enclosed the revised manuscript entitled “Processes governing the mass balance of Chhota Shigri Glacier (Western Himalaya, India) assessed by point-scale surface energy balance measurements” by Azam et al. to be published in The Cryosphere.

We are happy to know that the revised manuscript met the high quality of The Cryosphere and accepted for publication. Thanks for the minor correction. Now in the revised manuscript, proper reference (Parry et al., 2007) about the IPCC error is adopted. The changes about the reference are highlighted in red colour in the text as well as reference list.

All the authors listed on the manuscript are aware of re-submission of this manuscript to The Cryosphere and this manuscript has not been published previously nor is under consideration by another journal.

We are looking forward to read the manuscript proofs.

Yours sincerely,

Mohd Farooq Azam
