"We expect our results to be similar for higher-order (HO) models". This would be, to my opinion, very valuable to demonstrate this assertion. This all the more important, that the authors usually do not use an SSA model but the Batter-Pattyn for simulation of actual glaciers (e.g. <http://www.the-cryosphere-discuss.net/8/1873/2014/tcd-8-1873-2014-discussion.html>).
