As a relative newcomer to Greenland research, this is a great dataset to have available - thank you for bringing this to the community!

However, I have two concerns/suggestions about the dataset:

- 1) How continuously updated will the dataset be? Supplementary information to an article makes sense for a citation, but perhaps a separate DOI and understanding of version / update date would be helpful?
- 2) The spreadsheet format is good for some uses, but it would be really helpful for GIS

C238

users to have the dataset in shapefile format, too.

Thanks!
