Question to anonymous reviewer: In your review you state: “The correction for date offsets in DEMs has been addressed (or purposely ignored) in a number of recent publications but the paragraph that discusses this issue is lacking literature support.” It was not our intension to claim this as something new and realise that this lack of references is awkward. We are aware of numerous publications where seasonal corrections were carried out for geodetic mass balance data applying different approaches. We want to ask if there is any publication in particular, which you were thinking of where the need
