Received and published: 10 February 2015

A short comment: Interesting paper, however, more or less similar dataset and more or less similar analyze regarding indices were published in 2014 in this paper: <http://onlinelibrary.wiley.com/doi/10.1111/geoa.12053/abstract>

As a minimum the authors should refer, compare, and discuss their results against this all rerady published study from Geografiska Annaler: Series A, Physical Geography.
