Dear Prof. Cuffey,

We would like to thank you for your attention to our paper, and your very positive review and compliments! In fact, the slower diffusion process came as a surprise to us, too. Your questions and remarks are of course very relevant, but we believe that in the discussion section of our paper we already have a long discussion section in which we "tell what we know" and what we do not know. And at this stage we are not able to add additional information. Therefore we propose to publish our paper "as is" .

On behalf of all authors, Harro Meijer
