

Interactive comment on “Evolution of ice-shelf channels in Antarctic ice shelves” by R. Drews

RD Drews

rdrews@ulb.ac.be

Received and published: 28 April 2015

Thank you for your constructive comments which helped to improve the current version of the manuscript, particularly by making it more accessible for readers. Virtually all of the proposed points have been implemented in the revised version. The supplement contains a point-by-point response (review_response2.pdf) where the reviewer's comments are marked italic and responses are marked in bold. In the revised manuscript changes are marked in bold (rdrews_revised_track_changes.pdf).

Reinhard Drews, Laboratoire de Glaciologie, Université Libre de Bruxelles, Brussels
