Received and published: 18 May 2016

Dear authors,

Thanks a lot for your point-by-point responses to the referee's comments. Your letter suggests that you may be able to address most of their comments in a revised manuscript.

Thus, I would like to ask you to submit a deeply-revised version of the manuscript that will be evaluated by the referees. Make sure that all your conclusions are firmly supported by your data.

Best regards,

Etienne Berthier
