

Reply to comments by on “Mapping and inventorying active rock glaciers in the Northern Tien Shan of China using satellite SAR interferometry”

We thank all reviewers and the editor for their comments on our revised manuscript. Only one minor editorial issue was raised. We have fixed it.

Review #1: went through the revised manuscript and spotted only one small typos in the caption of Figure 1 ("... the footprints of seven frames of PALSAR frames ..." should be "... the footprints of the seven PALSAR frames ..."). The authors well considered the reviewer's comments in the revised version of the manuscript.

Authors: Thanks. We have removed the redundant words and it now reads “The black dashed boxes outline the footprints of seven PALSAR frames along Paths 501–507”. (2nd line on page 21)
