

Interactive comment on “Uncertainty budget in snow thickness and snow water equivalent estimation using GPR and TDR techniques” by Federico Di Paolo et al.

Anonymous Referee #1

Received and published: 7 February 2017

Based on the comments and remarks within the supplemented PDF my suggestions is to reject the manuscript in the present form unless inconsistencies can be unambiguously resolved, the data interpretation revised and the discussion of the results be set into a more general valid, broader context.

Please also note the supplement to this comment:
