Interactive comment on "Impacts of black carbon and mineral dust on radiative forcing and glacier melting during summer in the Qilian Mountains, northeastern Tibetan Plateau" *by* Y. Li et al.

M. Tedesco (Editor)

cryocity@gmail.com

Received and published: 11 June 2016

I have read the paper by the authors and the comments from the first reviewer and by the other colleague. I agree that there the paper, in its current form, doesnt meet the requirements for being accepted and should be rejected.

Marco Tedesco, Associate Editor
