

Interactive comment on “Wave climate in the Arctic 1992–2014: seasonality and trends” by Justin E. Stopa et al.

Anonymous Referee #1

Received and published: 29 March 2016

The paper is a thorough investigation of the changing wave and ice climate in the Arctic ocean. The paper will serve as a baseline study of conditions in the Arctic upon which future studies can build. I recommend the paper is accepted as is.
