Dear Editor Dominé,

Thank you and the reviewers for your reviewing and editoral efforts with our manuscript. I could not agree with both reviewers that this study is just a regional analysis and should be published in a regional journal. If we take a simple statistic of the papers published in The Cryosphere, we will easily see that majority of the papers are regional studies instead of global studies. Anyway, please withdraw our manuscipt and we will submit it into another journal.

Sincerely,

Xianwei Wang
