Dear Authors,

Both reviewers note the scientific quality of your paper. However, they also both note the insufficient scope and originality of the work. While I do not doubt your competence and agree with the reviewers that your study does have some interest, I believe it does not contain enough novelty for publication in the Cryosphere. I therefore very much regret that I cannot accept it for publication. I nevertheless encourage you to resubmit it elsewhere.

Florent Domine

Co-Editor in Chief
