Received and published: 16 May 2018

Dear Léo Decaux,

the two referees provided an extensive evaluation of your manuscript and identified substantial weaknesses. I therefore ask you to consider all of them thoroughly in the revised version of your ms. Please take special care for those issues related to assumptions and methodology. Based on the revision I will evaluate whether the ms is in principle suitable for publication in TC and a further round of reviews.

Regards, Olaf

Co-editor in Chief for TC
