Might be good to compare the results of this interesting analysis with the work I did with Julian Dowdeswell in 1996:

Siegert, M.J. & Dowdeswell, J.A. Spatial variations in heat at the base of the Antarctic Ice Sheet from analysis of the thermal regime above sub-glacial lakes. *Journal of Glaciology*, 42, 501-509. (1996).

See attached.

The values are quite similar I think.
