

Interactive comment on “Elevated melt causes varied response of Crosson and Dotson Ice Shelves in West Antarctica” by David A. Lilien et al.

Anonymous Referee #1

Received and published: 14 March 2018

By EO I mean Earth Observation. Published basal melt rates based primarily on EO data (e.g. Rignot et al., 2013; Depoorter et al., 2013; Gourmelen et al., 2017) show no evidence of freeze-on, supporting your observation.
