Dear Prof. Haas and members of TC editorial board,

I have now revised my manuscript making some minor corrections to clarify and improve the text and extended the abstract according to the reviewer suggestion. I also included a version (latex/tex) with the table and figures placed in the included supplement zip package. Also all the related tex-files, figures and the pdf with changes tracked are included in the zip package

5 Thank You!

Sincerely, Juha Karvonen, FMI
