Received and published: 18 May 2018

We have found the comments of referees to be very pertinent and helpful, we do appreciate very much their efforts and want to express here our gratitude for their work. In the attached ZIP file we provide a PDF document with the answers to each comment and the modifications we have done to the paper to address them. The document includes the comments of the referees in bold text, and quotes of the paper to provide context to the answers in standard text. The actual answers are presented in blue. The answers to referee #1 start on page 1, for referee #2 (Brad Lipovsky) on page 18 and

the ones to referee #3 on page 27.

The ZIP file also contains the new version of section 5.2 (Model results) and a re-encoded version of the model animation (Movie #2), to make sure that it plays correctly for all referees.

Sincerely,

Camilo Rada
