Received and published: 26 August 2018

A full response to both reviews has been attached as a pdf to preserve formatting, with our responses in red. Figures with substantive changes have been attached, along with a figure showing analysis of equivalent ice area as requested. The revised introduction and data/methods section has been included as well due to some of the more extensive edits occurring in response to the reviewers' suggestions.

Please also note the supplement to this comment:
