Interactive comment on "Dynamic Ocean Topography of the Greenland Sea: A comparison between satellite altimetry and ocean modeling" *by* Felix L. Müller et al.

Anonymous Referee #2

With apologies to the authors, I see a typo in my review.

In the last paragraph on page C3, starting "Comment on section 2.3.3"; the fifth line of this paragraph should read "signals at around 100 km resolution" - and not, of course, 100 m resolution.

Apologies again.
