Dear Authors,

We have now received the comments of the three reviewers, and you have answered individually to each of them.

Reading these, I believe you can work on a revised version of the manuscript. It will obviously require improvement of the written english, as commented by the three reviewers. Please use the skills of your co-authors that are english-natives!

To ease the procedure on my side, I would recommend you produce three documents:

Printer-friendly version

Discussion paper

a) a synthesis document of your replies to the three reviewers comments point by point, referring to changes in your revised manuscript (line numbers referring to the new manuscript with highlighted changes (see b))

b) a version of the new manuscript with highlighted changes and line numbers

c) a "clean" version of the new manuscript

Good luck with it,

Best regards,

Jean-Louis Tison
