Received and published: 2 January 2019

Dear colleague,

we thank you for your in-depth review and many helpful comments. Based on your and the other reviewers comments we have substantially revised and reformulated the paper in many places and fixed language issues. We hope that we have addressed appropriately your feedback.

For you information we have uploaded our response to both reviews as acrobat comments included in your review and have also included the current paper-draft where we have implemented all changes.

Best regards, Christopher Wiebusch for the authors
