Dear Dr. Matsuoka,

We are thankful to the two reviewers, who have provided helpful and insightful comments to our manuscript. All of their remarks have been considered; the response to reviewer details our responses to the reviewers and how we included their remarks.

The new version of the manuscript mostly includes additional clarifications of the text and small changes into a couple of figures and tables so that the models and their characteristics can be more easily visualized.

Best regards,

C1

Helene Seroussi, on behalf of authors
