Received and published: 18 June 2018

Based on the comments from two reviewers and my views as associate editor, I am recommending rejection of this manuscript. I believe that the authors can withdraw the manuscript from their end if they wish to do so. Resubmission of the manuscript to The Cryosphere would be available once the authors have addressed all of the reviewer comments. Since this is likely to take considerable time and effort, I am rejecting the manuscript as it is at this stage.
