Received and published: 18 February 2020

Dear Referee,

We would like to thank you for careful and thorough reading of this manuscript and for the relevant comments and constructive suggestions, which have helped us to significantly improve the quality of our manuscript.

We have included all the reviewer comments (in black) and responded to them individually (in blue) in the document attached to this response in the supplement section, indicating exactly how we addressed each of them by describing how the changes have been implemented

We hope that with the provided explanation and improvements, this revised manuscript will be better suitable for publication in the Cryosphere journal.
