Received and published: 16 April 2020

The authors would like to thank the reviewer for their comments on how to improve the readability and robustness of the paper. All the minor text changes will be made as suggested. The main complaint is a reasonable one and is actually in line with our own thinking. This requires a small amount of wordsmithing, as the reviewer has suggested, and we are happy to do that. The short narrative on the available accommodation will also be tweaked to make our thinking clearer, in response to the reviewer comment. We are confident that all of the comments can be addressed relatively quickly and simply. Thank you for reviewing our manuscript.
