

Comments to the Author:

Editor: One final point that should be clarified - The Figure 7 caption indicates the figure is showing incident shortwave radiation, which one would normally interpret as incident downwelling shortwave. The text on line 233 indicate net shortwave (downwelling-upwelling), which would be the absorbed shortwave. I think the figure is showing net. If so, the caption should be fixed

Authors: Yes, the Figure 7 indicates the net shortwave that we have corrected in the caption. Thank you so much for your suggestion.
