Dear Editor, Unfortunately, you have not provided the opportunity to resubmit the revised version of manuscript incorporating the changes suggested by both the reviewer. Moreover, the recently published paper, “Geospatial analysis and simulation of glacial lake outburst flood hazard in Shyok Basin of Pakistan” is confined to Shyok Basin only whereas the paper under discussion is the comparative work of both Shyok and Hunza basins. If deemed feasible the revised version of manuscript can be restricted to Hunza basin only. Regards.
