

I would like to thank both reviewers for their thorough and constructive comments on this manuscript and also the authors for posting their response to the reviewers' comments.

Both reviews are positive, but they raise a number of issues that require clarification or revision to the original manuscript. In their response, the authors clearly outline the steps that they propose to take to address all the points raised by the reviewers. I therefore invite them to submit a revised version of their manuscript.

Kind regards,

Pippa Whitehouse
