

Dear Olaf,

Thank you very much for accepting our manuscript for publication in The Cryosphere. The word “Projections” only appeared falsely in the marked-up version of the manuscript, in which the changes in the “Data availability” section were not automatically detected by the software latexdiff, and something went wrong when manually highlighting the changes in this section. Therefore, the uploaded manuscript is equal to the version uploaded on 14 Dec.

Thank you for the rapid handling of our manuscript, we appreciate this very much.

Best regards, on behalf of all co-authors,
Eef
