

Interactive comment on “Spatial and temporal variations in snow chemistry along a traverse from coastal East Antarctica to the ice sheet summit (Dome A)” by Guitao Shi et al.

Anonymous Referee #1

Received and published: 9 November 2020

Please note that when I wrote "For example all the surface samples are collected in the summer, when generally sea salt is high and sulfate is low.", I meant the opposite "For example all the surface samples are collected in the summer, when generally sea salt is low and sulfate is high."
