Received and published: 18 May 2020

Dear Javier Blasco and coauthors,

we now received three reviews for your manuscript. As the discussion phase will be ending soon I invite you to start to prepare a revision of your manuscript. The revision should consider all the points raised by the reviewers.

After the termination of the discussion phase you will receive a formal notification from the editorial system stating that "You - as the contact author - are requested to individu-

ally respond to all referee comments (RCs) by posting final author comments on behalf of all co-authors". You can keep your response in the "final response form" very short, basically stating that you will consider all points in the revision. Only after you finished the "final response form" I can make the formal decision about the further handling of your manuscript, i.e. to invite a revision.

Best Regards, Olaf Eisen

Co-Editor in Chief
