

**Response to Editor's comment (minor revision)**

**On line 442, change to "Although we cannot conclusively say so, this increased “signal-to-noise” ratio may have..."**

Thanks for the suggestion. It is changed to: “.....*Although we cannot conclusively say so, this increased “signal-to-noise” ratio may have caused presence of the nadir CCR elevations only in the ~9 m central section along the photon streak in Fig. 6b (red rectangle).....*”
