

Authors Response to the accepted version from 12.10.2022

We thank the editor for accepting the manuscript.

As requested by the editor, we have revised the references for the final manuscript version in order to

- Standardize all information
- specify the doi for all references
- or including ISBN as “Persistent identifier” for book references

according to the submission guideline.

Furthermore, we have added the source (Esri) more visible within the figure 4 according to the comment from the editorial support team.
